

# Gold Bangle Automatic Polishing Machine

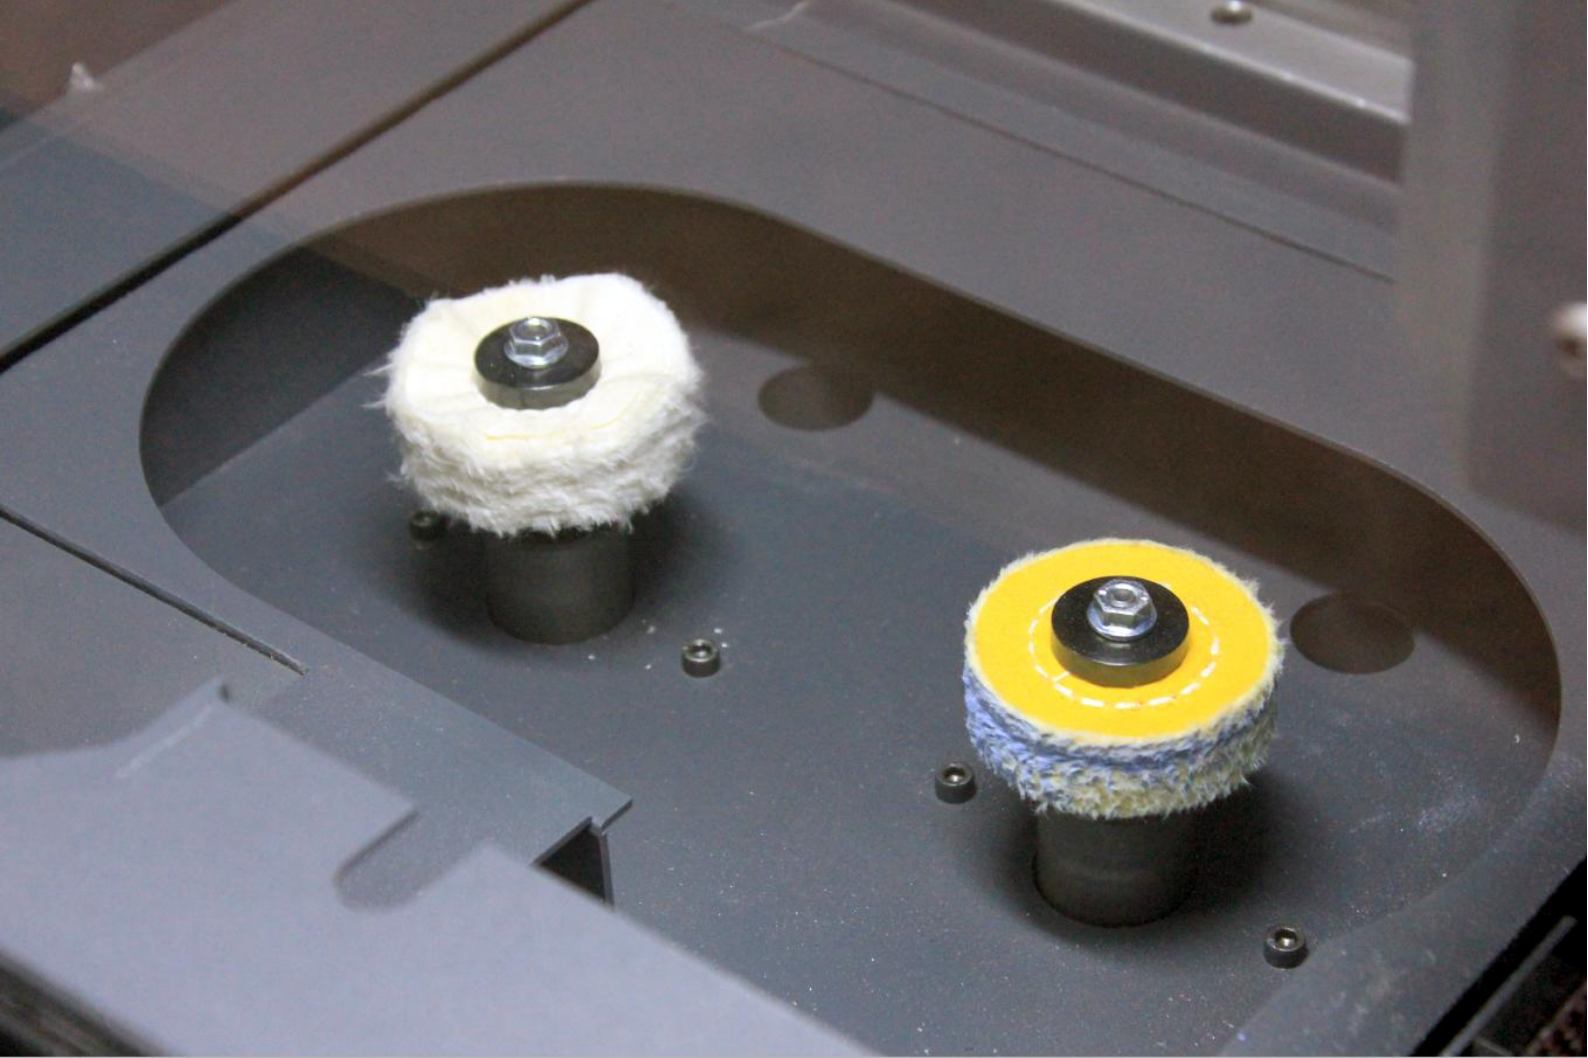

*The automatic bangle polishing machine we developed performs the polishing process of bracelets of different sizes completely automatically in a short time.*

*Thanks to the continuous equal pressure, the waste that occurs during the bangle polishing process is much less compared to the manual polishing process.*

*With our automatic polishing paste application system, the frequency and amount of paste application to the felt can be adjusted.*

*Thanks to the closed cabin, all waste remains inside the machine. Thus, the polishing process is completed with zero waste.*

*Meet our machine that changes the understanding formed so far in the jeweler polishing machine sector and polishes fully automatically, without touching, without making any adjustments, without an operator.*

### *Zero Waste*

*Thanks to our machine's fully enclosed cabin, operator-free operation and vacuum system, you can avoid losses caused by splashing and contamination to the operator.*

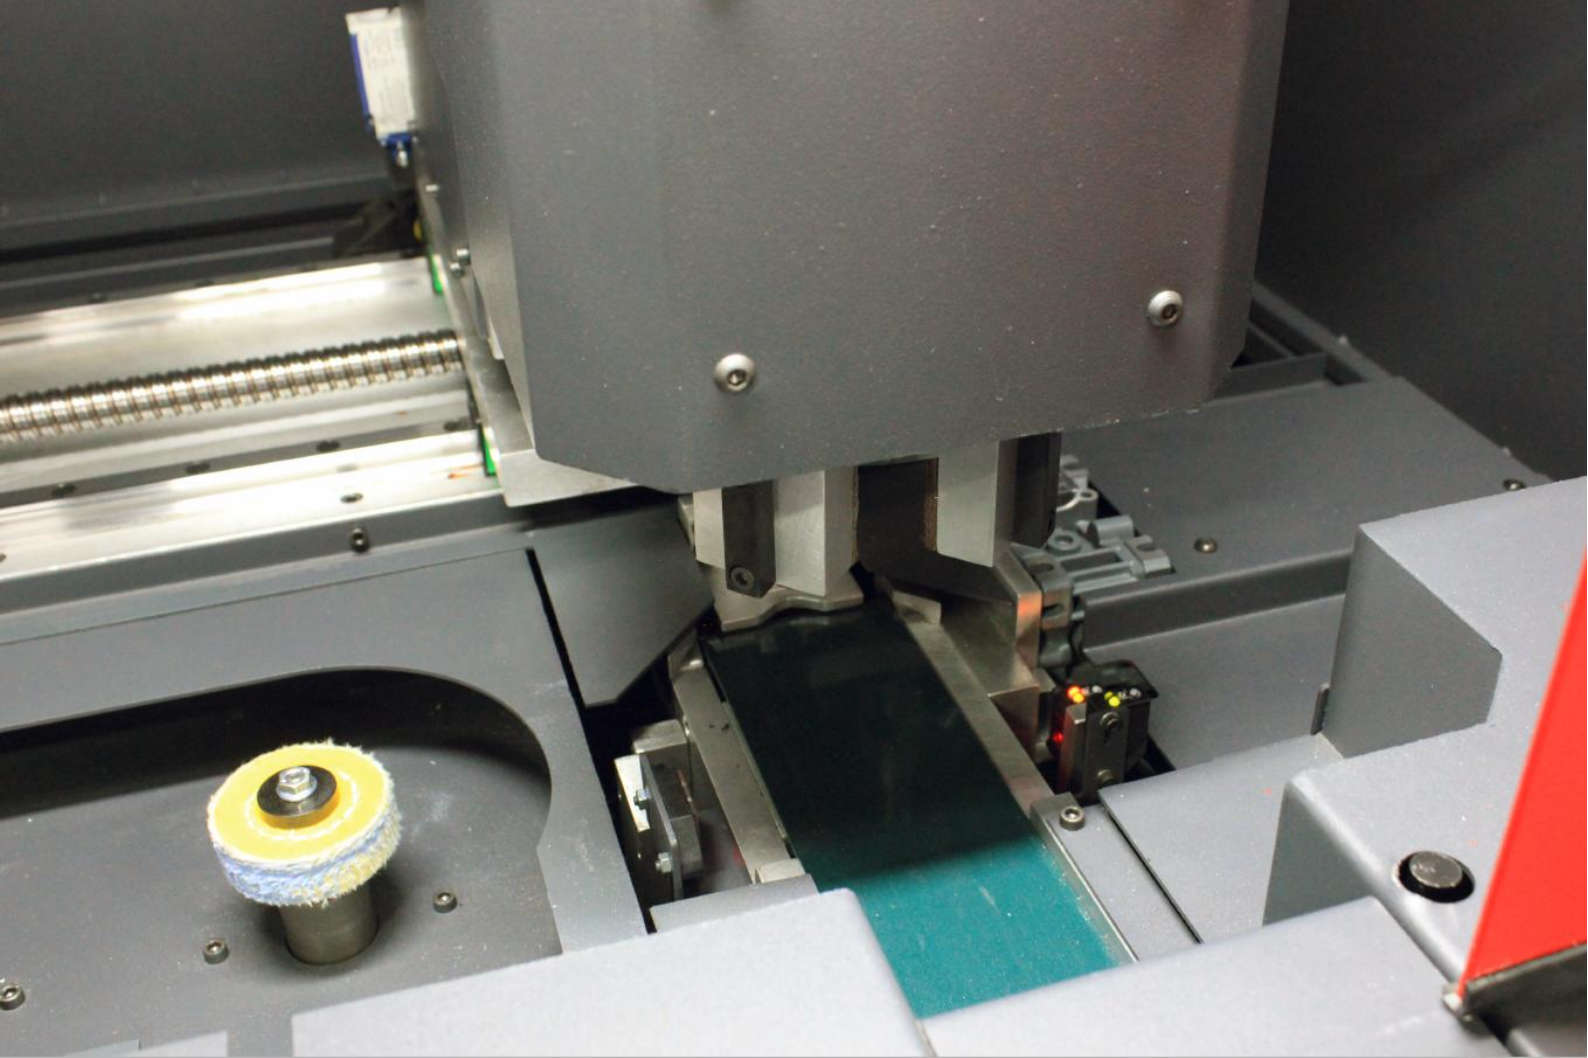

### *Zero Labor*

*Since our machine performs all operations automatically, it does not need an operator.*

### *Equal Polishing*

*Thanks to the software we developed, you get the same result on every bracelet, regardless of its size.*

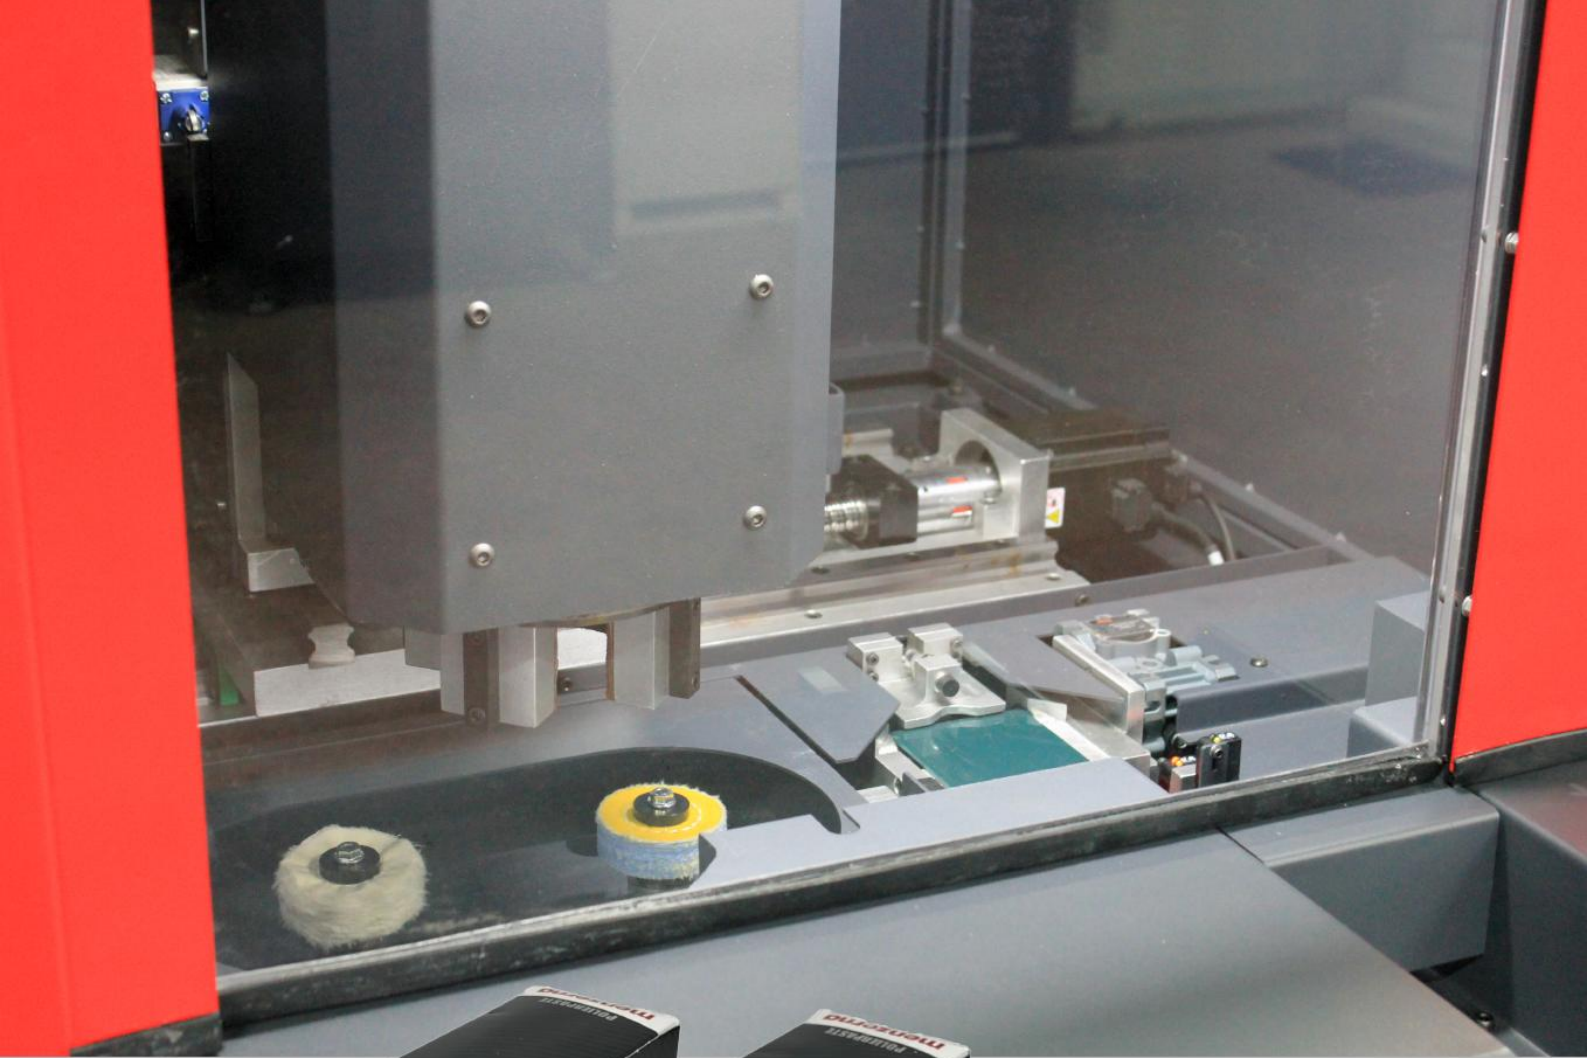

<i>Capacity</i>	<i>40 pcs/ hour</i>
<i>Total Power</i>	<i>5 kW</i>
<i>Machine Dimensions</i>	<i>92cm X 145cm X 170cm</i>
<i>Machine Weight</i>	<i>500 kg.</i>
<i>Polishing Speed</i>	<i>3000 rpm</i>
<i>Feather Speed</i>	<i>3000 rpm</i>
<i>Vacuum Unit</i>	<i>Available</i>
<i>Filtration</i>	<i>Filter and Bag</i>
<i>Control Unit</i>	<i>Special Full Automatic Control Unit</i>
<i>Control Panel</i>	<i>7 " Touch Panel</i>
<i>Paste Application</i>	<i>Automatic</i>
<i>Bracelet Definition</i>	<i>Automatic</i>
<i>Rubbing Force</i>	<i>Automatic</i>
<i>Bracelet Height</i>	<i>8 - 35 mm</i>
<i>Bracelet Outer Diameter</i>	<i>55 - 75 mm</i>
<i>Interior Lighting</i>	<i>Available</i>

*Automatic Polishing Paste Application*

*Easy Polishing Disc Change*
